REPORT OF CEMETERY ASSOCIATION

To the citizens of the Town of Bridgewater and members of the Bridgewater Cemetery Association, we herewith submit our annual report:

During the past year a fine spirit of cooperation has been shown by the members of your Association. Our cemeteries have been well taken care of and are a credit to the town. A larger amount of money was received from assessments than in the previous year and with economic conditions improving, we should be able to expand our work.

There has been much discussion regarding the building of a vault for Winter use at the Smith Cemetery. It is a matter worthy of consideration and we trust that this project can be a reality within a short time.

We herewith present the financial condition of your Association as of March 1, 1937:—

Cash on Hand March 1, 1936	\$ 42.00	
Received from Town of Bridgewater	100.00	
Received from Milliken Cemetery		
Trust Fund	120.00	
Received from Assessments	124.00	
	<hr/>	\$386.00
Expended for Caretaker	\$282.25	
Expended for Grass Seed	4.30	
Expended for Postage and Receipt		
Books	3.20	
	<hr/>	\$289.75
Unexpended March 1, 1937		<hr/> \$ 96.25

Respectfully submitted,

H. A. MacILROY, President

PRINCIPAL'S REPORT

To the Trustees of Bridgewater Classical Academy and
Citizens of Bridgewater:

School opened last October with an enrollment of sixty-three pupils with Mr. Robinson as principal and instructor in mathematics and science, Miss Helen McCaughey as instructor in English and Latin, and Mr. Ned Packard as instructor in French and History.

The time length of the class periods has been increased from forty minutes to fifty-five minutes. This change seems to have been beneficial to both teachers and pupils as the school records show a lessening in the number of pupils failures.

The school has sponsored the following extra-curricular activities: basketball for both boys and girls, winter sports for boys, dramatics, speaking, school paper, girls glee club and school socials. This program is broad enough so that practically every pupil in the school will take part in some outside activity.

The parents and citizens of the town have given excellent support to all school activities. Forty-three dollars was subscribed for basketball, cars have been

available for basketball trips, and there has been good attendance at all of the public functions of the school.

State law compels the town to spend seventy-five dollars per year for laboratory equipment, and seventy-five dollars per year for the school library. Last year a fifteen volume set was bought for science reference, and twelve books were put on the reference shelf for English and History. General chemistry equipment and reagents were purchased with the seventy-five dollars for laboratory equipment.

This one hundred fifty dollars which must be spent yearly is an excellent investment for good laboratory equipment vitalizes a science course for the student, and adequate reference material is as necessary as the text book.

Respectfully submitted,

LLOYD H. ROBINSON, Prin.

REPORT OF SUPERINTENDENT OF SCHOOLS

To the Superintending School Committee and Citizens of the Town of Bridgewater:

Pursuant to Chapter 16, Section 59 of the Laws of Maine I am pleased to submit herewith my fourth annual report as superintendent of the Bridgewater schools.

Due to the retardation of harvesting the potato crop last fall, the opening of the fall term of school was deferred until October 5th. Although opening schools on this late date will necessitate continuation through the spring term until June 25th it may be more desirable to do this than to maintain school earlier in the

fall with the very unsatisfactory attendance. Orderly and efficient progress in the schools is impossible with attendance ranging from forty to sixty per cent of actual enrollment and this condition seems bound to prevail if the schools are opened before the potato harvesting season is generally over. Undoubtedly economic conditions in the town may be better another year so that it will be possible to open school for the fall term at an earlier date than was the case this school year. Undoubtedly, the efficiency of school, particularly for the young children, during the latter part of June when the weather is ordinarily extremely warm, is bound to be diminished in very large measure.

There have been some changes in the personnel of the teaching staff since last year. Miss Rena Fletcher of Bridgewater, a teacher of six years' successful teaching experience, succeeded Miss Bertha Lawrence in the intermediate building, Miss Lawrence resigning to accept a position in Presque Isle. In the Boundary Line School, Miss Helen Parsons of Bangor, a graduate of Farmington Normal School with one's year's experience in Burnham, Maine, succeeded Miss Muriel Burns who resigned and has accepted a position in the primary grades at Corinna. Miss Hazel Prescott of Chelmsford, Massachusetts, a graduate of State Teachers' College, Bridgewater, Massachusetts, succeeded Miss Margaret Lowell as teacher of the Monteith School. It is a pleasure to report that all three of these teachers are doing very excellent work in their respective schools.

Consolidation

With the likelihood that all roads may be snow plowed and open to motor traffic within a short time now I feel that serious thought should be given to the matter of completing the two unfinished rooms in the

new intermediate school building with the purpose in view of completely consolidating the elementary schools of the town. If these two rooms could be finished and the heating plant accommodated to their use we would then have a completely graded system with an individual teacher for each grade and ample room for schooling all pupils of the town, including those pupils now in attendance at the Boundary Line and Monteith Schools. I do not know what the attitude of the citizens of the town would be generally with regard to disposing of the two rural schools now in occupancy, but it would seem that if these two schools could be sold the proceeds of such a sale together with a State Project allotment which I feel very sure could be secured through the Department of Education would combine to make possible the completion of the two rooms in question without necessitating an unduly large direct appropriation. I am not necessarily advocating the above procedure for immediate action but rather suggesting it as a matter for the consideration of the citizens of the town.

Conveyance

The School Department has effected during the past two years a consolidation of school conveyance routes during the period of motor travel whereby the six regular routes formerly cared for by six different contractors are now taken care of by three transportation drivers each of whom has two routes. This consolidation has meant the saving of considerable money during the past two years. Moreover, a conveyance driver, who has two routes to cover, having an added responsibility is much more likely to adhere closely to a scheduled time than would be the case with a conveyor having but one route.

What I am leading up to is the fact that while I consider our conveyances improved they are really not too satisfactory types of transportation in this day of ever increasing motor travel and highway congestion with the attendant hazards to school children. I believe that the Bridgewater conveyors are providing the best type of motor driven conveyances that they can afford in consideration of the salary that they receive for their services. I believe that it is entirely within the possibilities of the town and I cannot see where it would cost any more, appreciably, if the town should purchase a school bus, which could serve three of the six school routes during the fall and winter terms and possibly throughout the year if the roads were all plowed. In any event this bus could serve the Main Road Routes both north and south throughout the year and if operated by the janitor and housed in the basement of the new school building which could be accommodated to this purpose over a period of five years the per pupil cost for transportation would be not greater than it is at present. Two buses of sufficient capacity could care for the entire six routes and if one bus were purchased and proved satisfactory it might be in order to purchase a second one to entirely care for the transportation of school pupils in the town. I expect that many will, at first though, regard this suggestion as a luxury and an extravagance that the town of Bridgewater cannot afford. However, may I call to attention the fact that many towns much smaller than Bridgewater operate municipally owned school buses and do not find them an extravagance. I have investigated the matter of school buses quite thoroughly and find that a very satisfactory bus, seating thirty-six pupils, can be purchased complete for about \$1300.00. Moreover, I have secured from the Department of Education the promise of a \$500.00

allotment from the special project fund to be used toward the purchase of a bus should the town decide to purchase one. This would make the actual cost of the bus to the town only about \$800.00 and with good care it certainly should last at least five years. I believe this is a matter that warrants consideration and I shall be pleased to hear from parents and any others who may be interested concerning their opinion on this matter. With all due regard to the conveyors now employed, all of whom I know are careful drivers and are doing the work to the very best of their ability, I feel that most parents would have a feeling of somewhat more security if they know their child was being transported to and from school in a bus adapted and designed to meet the requirements of the law with regard to the safety of school children being conveyed. Principally among these safeguards is the emergency rear door and the operator-controlled entrance and exit which gives assurance that pupils are not going to fall or be pushed through an open door. Another feature is the fact that the operator of the bus is with the children and can see and be responsible for the actions of all of them. The problem of our conveyance drivers who are obliged to be in their cab absolutely apart from the children is most obvious.

Public School Music

I have been pleased to learn that the Women's Club of the town of Bridgewater are endorsing and endeavoring to stimulate interest in the introduction of a course in Public School Music in the Bridgewater schools. While I realize that many are prone to regard music taught in the schools as more or less of a frill or fad I cannot regard music in this category. We maintain our schools in order to do the greatest good to the

greatest number. Music wisely selected and taught will develop children mentally, physically and socially. Without going into great detail I want to state my position as being in favor of the introduction of a course in Public School Music if the voters of the town are willing to provide the extra appropriation that will be necessary. The initial cost for music books to equip all elementary pupils of the town would be about \$250.00. It would seem that the services of a music supervisor for two days a week would be amply sufficient. The cost of such supervision is, of course, difficult to accurately estimate. Based upon the salary of the music supervisor in the one town in the union that has a supervised course of music this expense would be about \$400.00. I understand that we have in Bridgewater a young lady, who is qualified both by training and experience, to supervise a course in music so that first hand information with regard to the salary aspect should be available.

The manner in which the town officials have been able to meet payrolls and pay all schools bills, both current and those of long standing, regularly and on time, has certainly been a pleasure and has done much to expedite the keeping of accounts. For the first time in my four years as superintendent, there are no outstanding school bills unpaid insofar as I know. This is certainly an excellent record and is a credit not only to the town officials but most directly to the many citizens of the town who by the prompt payment of their taxes have made this record possible.

In conclusion I should like to express a proper appreciation to the several teachers, school and town officials, and all others who have in any way contributed to the welfare and progress of the Bridgewater schools.

Respectfully submitted,

JOSEPH A. LEONARD

· STATISTICAL CHART—FALL AND WINTER TERMS, 1936-1937
